

To connect to the Apopka Free WiFi Network in Windows XP, follow these instructions.

Click on the Start button, select “Connect To,” followed by “Show All Connections.”

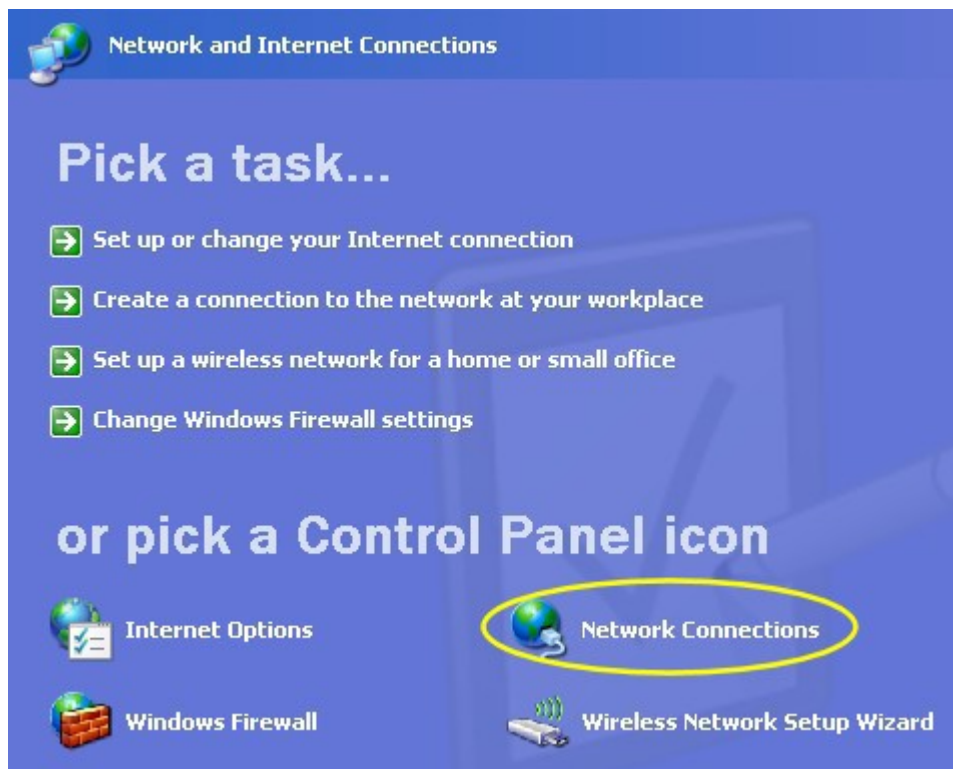

If you do not have a “Connect To” menu option, select Control Panel.

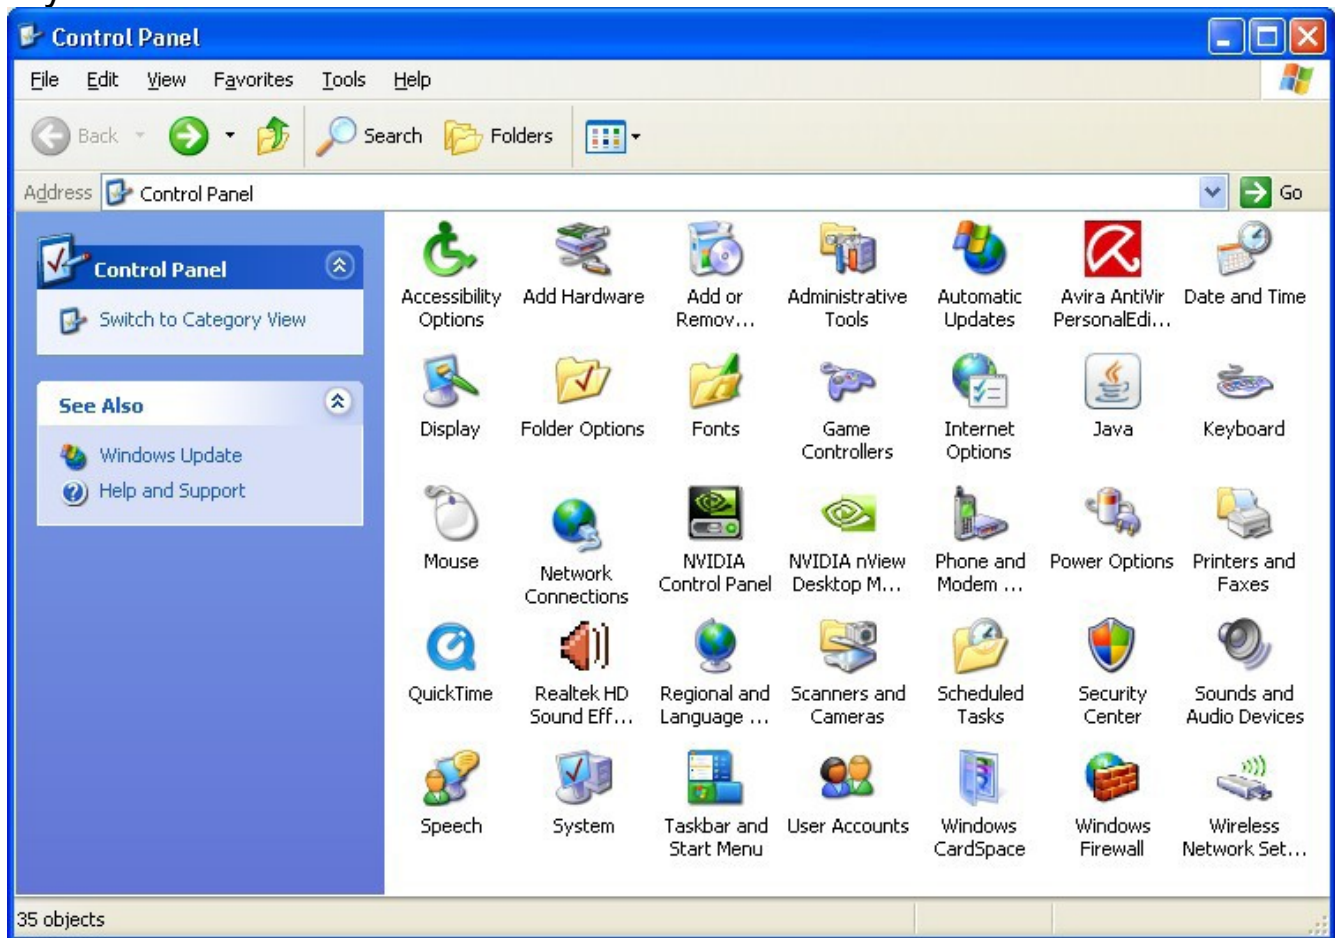

If you Control Panel looks like this:

Click on “Network and Internet Connections,” Followed by the Network Connections icon:

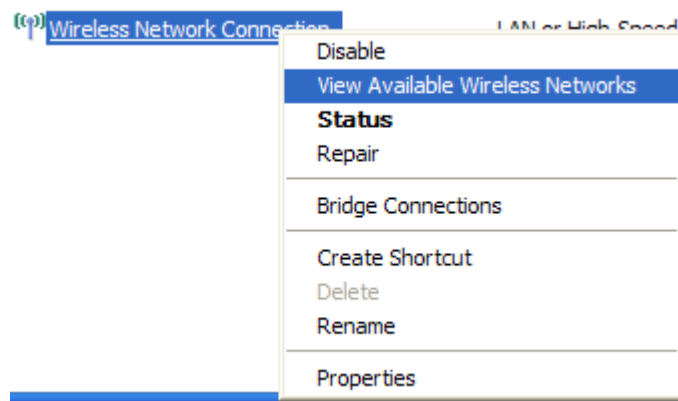

If your Control Panel looks like this:

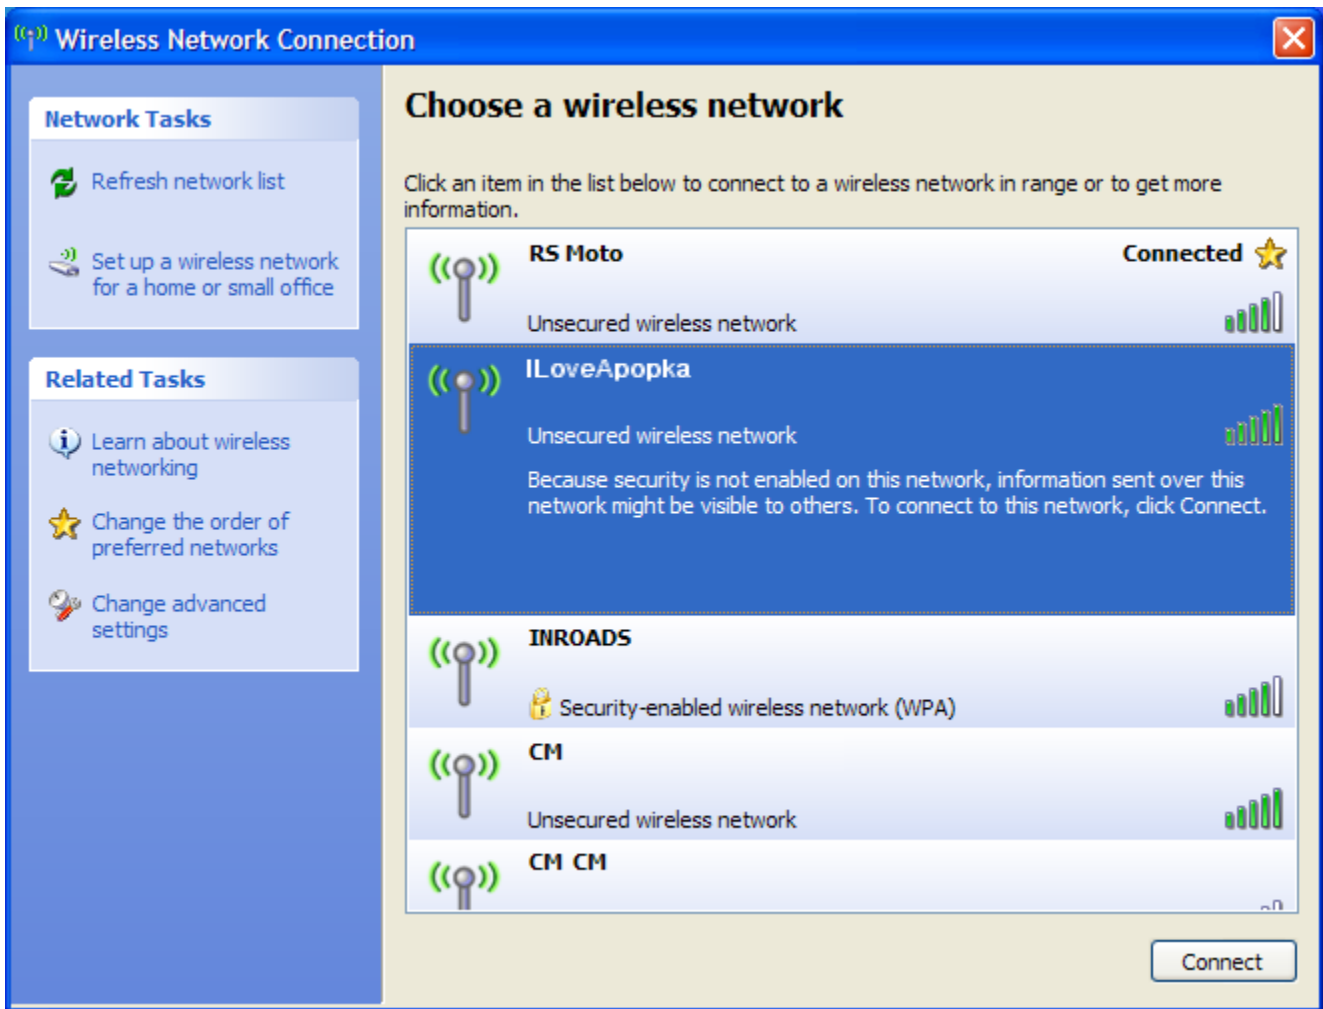

Find and locate the “Network Connections” icon, then double-click it:

Once you're at the Network Connections window, Right click on “Wireless Network Connection” and select “View Available Wireless Networks”

Highlight the “IloveApopka” network and click "Connect"

If you get this prompt on connecting to the Access Point:

Click on “Connect Anyway” to connect to the Access Point.
